

Reimage Web team home test

Requirements:

- Build attached page in HTML4 (not 5) without any external libraries.
- Using only CSS2 (not CSS3)
- Cut any needed images from the PSD.
- Add javascript validation on the form fields - not empty + valid email – needs to be in clean (“vanilla”) javascript – no external libraries (for example – no jQuery, bootstrap, etc.)
- The right-side panel need to scroll with the page and be always visible (see example below) – needs to be in clean (“vanilla”) javascript – no external libraries (for example – no jQuery, bootstrap, etc.)
- Check on older browsers (for example – use IE tester <https://www.my-debugbar.com/wiki/IETester/HomePage>) - the page should be works at least from IE8 and above – very big advantage if it works on IE6.

Bonus:

- Submit the form to a php file that will print the fields to screen/log.

There are many reasons why Windows errors happen, including having malware, spyware, or programs not installing properly. You can have all kinds of system conflicts, registry errors, and Active X errors. Reimage specializes in Windows repair. It scans and diagnoses, then repairs, your damaged PC with technology that not only fixes your Windows Operating System, but also reverses the damage already done with a full database of replacement files.

A FREE Scan (approx. 5 minutes) into your PC's Windows Operating System detects problems divided into 3 categories - Hardware, Security and Stability. At the end of the scan, you can review your PC's Hardware, Security and Stability in comparison with a worldwide average. You can review a summary of the problems detected during your scan.

Windows Errors

A Windows error is an error that happens when an unexpected condition occurs or when a desired operation has failed. When you have an error in Windows, it may be critical and cause your programs to freeze and crash or it may be seemingly harmless yet annoying.

Operating System Recovery

Reimage repairs and replaces all critical Windows system files needed to run and restart correctly, without harming your user data. Reimage also restores compromised system settings and registry values to their default Microsoft settings. You may always return your system to its pre-repair condition.

Reimage patented technology, is the only PC Repair program of its kind that actually reverses the damage
